

How to download XAMPP?

1. Go to <https://www.apachefriends.org/index.html>
2. Click on "XAMPP for .." grey colored button according to your operating system to begin download.
3. Double click the downloaded file from your default downloads location. The file should be named something like 'xampp-win32-7.2.4-0-VC15-installer'.
4. By default, all attributes are included in your XAMPP installation. When prompted, you may uncheck any attribute you do not wish to install as part of XAMPP.
5. After installing successfully, click the Start button for Apache and MySQL and then click the Admin button of MySQL to open 'PHPMyAdmin' locally.
